March 12, 2026

Executive Summary

Key Market Findings

Top Contributing Families

Young families and mid-age families are currently the largest contributors to chip sales volume, representing the core growth demographic.

Purchase Drivers

Mainstream and budget customer segments drive the majority of category purchases, indicating high price sensitivity and mass market appeal.

Initial Trial Impact

Trial stores showed varying results initially after the new layout implementation, necessitating a deeper dive into

Trial Store Results

STORE 77	STORE 86	STORE 88
Strong Increase	No Change	Sales Increase

STRATEGIC RECOMMENDATION

- The new store layout shows clear potential to increase chip sales significantly.
- Rolling out the layout to more stores is recommended while continuing to monitor performance.

Customer Segments Driving Sales

Key Insights

Volume Drivers
Young families and older families purchase the highest volume of chips, significantly outpacing other demographic groups.

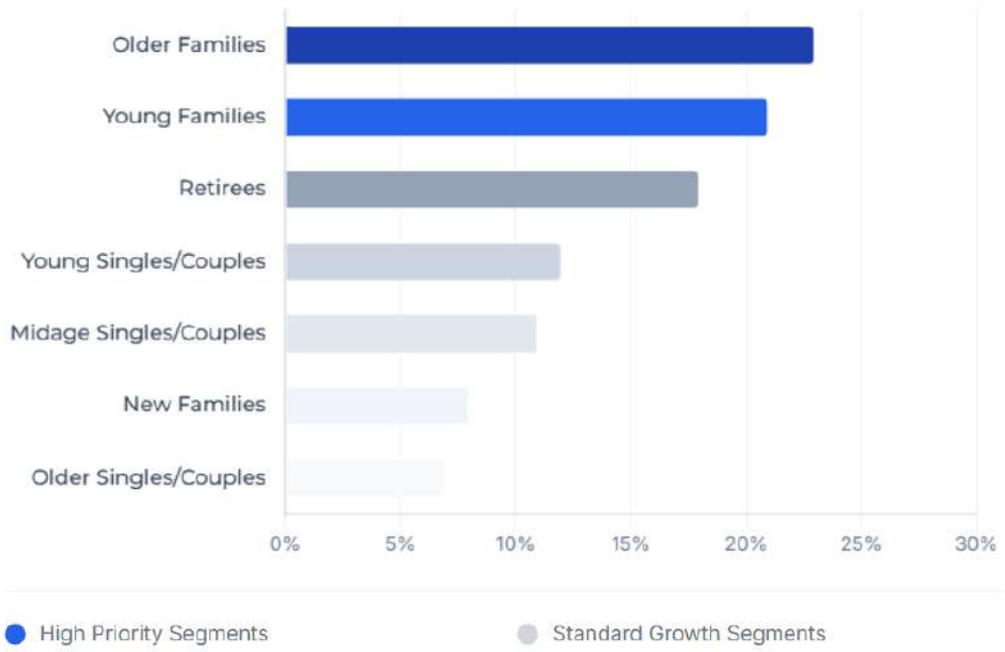
Dominant Segment
Mainstream customers represent the largest purchasing segment overall, driving total category throughput.

Premium Behavior
Premium customers tend to purchase fewer units per transaction but opt for higher price-point products.

STRATEGIC OPPORTUNITY

Segment Share of Units Sold

Breakdown of total chip volume by customer lifestage



Customer Purchasing Behaviour

Key Observations

Pack Size Preference

Families consistently gravitate towards **larger pack sizes**, prioritizing value and quantity per purchase over single-serve options.

Volume Drivers

Budget and Mainstream segments drive significantly **higher transaction volumes**, forming the stable base of category turnover.

Premium Spending

Premium customers exhibit a "quality over quantity" approach, focusing on **fewer but higher-priced** specialty products.

STRATEGIC ACTION PLAN

Recommended Focus Areas

To maximize category growth, promotional activities and shelf placement should be realigned to match these behavioral patterns.

Product Promotion

Prioritize promotions on **Large Family Pack Sizes** to capitalize on high-volume family purchases.

Segment Targeting

Tailor product visibility and placement strategies specifically for **Mainstream**

Trial Store Analysis

SELECTED TRIAL STORES

Store	Store	Store
77	**86**	**88**

CONTROL SELECTION CRITERIA

Control stores were rigorously matched using Euclidean distance scoring based on:

- Similar historical sales patterns
- Comparable customer behaviour & demographics

EVALUATION METRICS

- Total Sales Revenue
- Customer Count
- Transactions per Customer

Trial vs Control Performance

Pre-trial synchronization followed by trial period divergence (Example: Store 77)

Trial Results & Impact

Performance Comparison

TRIAL STORE

77

STRONG UPLIFT

Sales demonstrated a **significant increase** during the trial period when compared to the control store, suggesting strong customer reception to the new layout.

Sales Impact **High**

TRIAL STORE

86

NO CHANGE

Sales remained **statistically similar** to the control store performance. The layout changes appeared to have limited impact on purchasing behaviour in this location.

Sales Impact **Neutral**

TRIAL STORE

88

POSITIVE GROWTH

Sales **increased steadily** during the trial period. Data indicates the new layout positively influenced impulse purchases and category browsing.

Sales Impact **Medium-High**

Trial Conclusion

The new layout successfully drove growth in **2 out of 3** trial locations.

Layout Validated → Proceed to Rollout

Recommendations

Strategic Action Plan

ANALYSIS CONCLUSION

The new layout validates positive impact on sales.

Trial Success Rate **67%**

Sales performance improved in **2 out of 3** trial stores (Stores 77 & 88), confirming the layout's effectiveness in driving category growth.

Impulse Purchase Driver

Enhanced product visibility in the new layout specifically triggered higher impulse purchases among mainstream customers.

Recommended Next Steps

Expand Layout Trial

IMMEDIATE

Roll out the new layout to an additional 10-15 stores with similar demographics to Store 77 and 88 to validate scalability.

→ Target: Stores in family-heavy regions

Continue Monitoring

ONGOING

Establish a 12-week monitoring period for new trial stores to ensure sales uplift is sustained beyond the initial novelty phase.

→ Metric: Retention rate & frequency

Focus on Family Segments

STRATEGIC

Optimize planograms in trial stores to feature large family packs at eye level, catering to the highest performing customer segment.

→ Tactic: Bundle promotions for families
